— Shubham, Business Owner

★★★★★
"He even sent a report after fixing everything. Very professional."
— James, App Developer

❓ Frequently Asked Questions (FAQs)

Q: What access do you need to fix Apache errors?
A: We need SSH access with root or sudo privileges. You can revoke it once the work is done.

Q: How fast will you fix the issue?

A: Most fixes are completed within 24 hours from the time access is granted.

Q: Will my website go down during the fix?
A: We ensure minimum downtime. In most cases, we back up and test before applying final changes.

Q: Do you offer a refund if the issue isn't resolved?
A: Yes. If we can't fix the issue, you'll receive a full refund — no questions asked.

Q: Is this a one-time service or recurring?
A: This is a **one-time fix** per server for a single issue. If you want monthly monitoring, we offer that too.

Q: Can you handle panel-based Apache setups like cPanel, Webmin, etc.?
A: Yes, we support both panel-based and bare-metal (manual) Apache installations.
