– Laura, Agency Owner

★★★★★

"Excellent support. Always available and very skilled."

– Naveen, App Startup Founder

★★★★★

"Reverse proxy and SSL were done perfectly. Thank you!"

– Sarah, eCommerce Business Owner

❑ Frequently Asked Questions (FAQs)

Q: Which OS do you support?

A: We support all major Linux distros including Ubuntu, Debian, CentOS, AlmaLinux, and Rocky Linux.

Q: Can I upgrade my plan later?

A: Absolutely! You can move from Basic to Standard or Pro anytime by just paying the difference.

Q: Do you offer panel-based setups like cPanel or Webmin?

A: Yes. We can integrate Apache with popular control panels on request (additional charges may apply).

Q: What kind of SSL do you support?

A: We install Let's Encrypt for free. We also support custom SSLs if you already have them.

Q: Do I need to give root access to my server?

A: Yes, for full setup and optimization, root or sudo access is required. We respect security and can work with temporary access or over SSH key.

Q: What is your response time for monthly support clients?

A: We usually respond within 1 hour and start working on any reported issues the same day.

Q: Will you handle server migrations?

A: Server migration is not included in regular plans but available as a separate service.
