OpenVPN Server Setup

🔐 OpenVPN Server Setup Plan

Secure, Private, and Reliable VPN Access for Your Infrastructure

Our OpenVPN setup service provides a **fully secure** and **custom-configured VPN server** — perfect for remote access, secure tunneling, or inter-server communication.

🛠 What's Included in the Setup

- 🔧 **Installation & Configuration of OpenVPN Server**
- 🔐 **TLS/SSL Encryption with Custom Certificates**
- 👥 **User Account Creation (up to 5 included)**
- 🔁 **Auto-start on Boot**
- 🔥 **Firewall Rules & IP Forwarding Configuration**
- 🌐 **DNS & Routing Setup**
- 📄 **Client Config (.ovpn) File Generation**
- 🧪 **Basic Connectivity Testing**
- 🗂️ **Documentation for Client Usage**
- ⚙️ **Support for Ubuntu, Debian, CentOS, Rocky Linux, AlmaLinux**

💰 Pricing Plan

🔹 *One-Time Setup Fee: [$10/server](#)*

🔧 Use Cases

- 🔒 Secure remote access to internal networks
- 👨‍💻 Developer or sysadmin access to staging/production
- 🌐 Connect geographically distributed servers privately
- 🚫 Bypass geo-restrictions or filter firewalls

⚙️ How It Works

1. You provide server credentials (SSH access)
2. We install, configure, and test OpenVPN
3. You receive .ovpn files to connect securely

❓ FAQs

Q: Is this compatible with Windows, Mac, Linux, and mobile?
Yes! We generate standard .ovpn files that work with OpenVPN clients on all platforms.

Q: Will you help me add more users later?
Yes, additional user profiles can be added at any time with a minimal charge or included in ongoing support.

Q: Will this slow down my internet?
VPNs introduce slight overhead, but we optimize the setup for performance, compression, and reliability.

Q: Is the connection encrypted?
Absolutely. All data is encrypted using 2048-bit or 4096-bit SSL/TLS (your choice).

Q: Can I choose UDP or TCP?

Yes, we configure your preferred protocol during setup.

OwnCloud Server Setup

Transform Your Business with Secure, Scalable Cloud Storage

OwnCloud Installation & Configuration Service

Unlock the power of private cloud storage with **OwnCloud**. Our expert team ensures a seamless, secure, and fully customized setup for your business, giving you complete control over your data. Whether you're a small startup or a large enterprise, we provide the tools and support to scale your cloud infrastructure with ease.

Our OwnCloud Installation Service Includes:

- **Comprehensive Installation & Configuration**
  From server setup to software installation, we handle everything, ensuring OwnCloud runs optimally on your

infrastructure.

- **Secure SSL Integration**
  Protect your data with full HTTPS support. Our experts will configure SSL certificates for encrypted, secure access to your cloud.
- **Database Setup**
  We configure and optimize the backend database (MySQL/MariaDB or PostgreSQL) to ensure the best performance and reliability.
- **User Access Management**
  Implement role-based access control, configure users, and set up permissions to ensure secure data access.
- **External Storage Integration**
  Integrate third-party storage solutions (e.g., Amazon S3, FTP, WebDAV) to expand your cloud storage capacity.
- **Post-Installation Support**
  Enjoy ongoing technical support for troubleshooting, maintenance, and custom configurations. We ensure that your cloud system runs smoothly and securely.

Why Choose Our Service?

- **Expertise**
  With 15+ years of experience in cloud solutions, we provide professional installation, optimization, and support for OwnCloud.
- **Enhanced Security**
  We prioritize data security, ensuring your cloud storage is fully encrypted and protected against unauthorized access.
- **Scalable & Flexible**
  OwnCloud offers limitless scalability, perfect for growing businesses. We tailor the setup to your specific

needs, whether you're managing a few users or thousands.

- **Reliable Support**
  We provide comprehensive support, ensuring that you're never alone. From updates to system optimizations, we're here to help.
- **Cost-Effective**
  Reduce your reliance on third-party cloud services with a customizable solution that fits your budget.

Our Process:

1. **Consultation & Planning**
   We start by understanding your specific cloud storage requirements, server environment, and security needs.
2. **Installation & Configuration**
   Our team installs OwnCloud, configures the server environment, sets up secure access, and integrates your external storage.
3. **Security Hardening**
   Implementing SSL, firewall settings, and necessary security protocols to safeguard your cloud infrastructure.
4. **Ongoing Support**
   We provide regular maintenance and updates to ensure that your OwnCloud instance is up-to-date and running smoothly.

Client Testimonials

"I couldn't be happier with the OwnCloud installation! The team took care of everything, from setup to security. The

support has been excellent. Highly recommend!"
— **John D.**, CTO, **TechSolutions Inc.**

"Our business switched to OwnCloud for a more secure and private cloud solution. The installation was seamless, and the ongoing support has been invaluable. We trust them with our cloud infrastructure!"
— **Sarah K.**, Operations Manager, **RetailPro**

"The service was fantastic! We got everything set up in no time, and our cloud is now running smoothly and securely. Excellent team, great support!"
— **Michael R.**, Founder, **GreenEnergy Solutions**

"The level of professionalism and expertise they brought to the table was impressive. Our cloud storage solution is now faster, more secure, and completely under our control."
— **Linda M.**, IT Director, **InnovateTech**

"Their attention to detail and commitment to security has ensured that our data remains private and safe. I highly recommend them for any cloud installation needs!"
— **David B.**, CEO, **SafeStorage Inc.**

Frequently Asked Questions (FAQs)

1. What is OwnCloud, and why should I use it?

OwnCloud is an open-source cloud storage solution that allows you to securely store and share files, collaborate on documents, and manage data within your own infrastructure. It gives you full control over your data, making it ideal for businesses seeking a private and secure cloud environment.

2. How long does the OwnCloud installation process

take?

The installation process typically takes between 24 hours, depending on the complexity of your server environment and any additional integrations (such as external storage or security configurations). We ensure everything is configured for optimal performance.

3. Will my data be secure after the installation?

Yes! We prioritize security throughout the installation process. We implement SSL certificates, configure firewalls, and ensure encryption to protect your data. We also offer ongoing security monitoring and updates to keep your cloud safe.

4. Do you offer ongoing support after installation?

Absolutely! We offer post-installation support, including troubleshooting, updates, and custom configurations. Our team is available to ensure your cloud solution runs smoothly and securely.

5. Can you help integrate external storage (like Amazon S3) with OwnCloud?

Yes, we provide seamless integration with various external storage solutions, including Amazon S3, FTP, WebDAV, and more, ensuring you have the storage capacity you need for your growing business.

6. What server requirements are needed for OwnCloud installation?

OwnCloud can be installed on various Linux-based servers (Ubuntu, CentOS, etc.). We'll ensure your server meets the required specifications, including Apache/Nginx, PHP, and MySQL/MariaDB. If you need help with server recommendations, we can assist with that as well.

7. How do I get started with your service?

Simply reach out to us to schedule a free consultation. We'll assess your needs and provide a tailored plan for your OwnCloud installation, ensuring the best possible setup for your business.

Rsync Backup

🔐 One-Time Rsync Backup Setup – Only $10/Server

Secure Your Linux Server with a Reliable Backup Solution

For just **$10 per server**, get a **one-time professional setup** of an automated rsync-based backup system. No subscriptions. No recurring fees. Just secure, smart backups for life.

📦 What's Included in the [$10 Plan Per Server](#)

- ▪ 🔁 **Automated Rsync-Based Backup Script**
- ▪ 🔃 **Incremental Sync Configuration**
- ▪ 🔐 **Secure SSH-Based Data Transfers**
- ▪ 📅 **Daily/Weekly Scheduled Cron Jobs**
- ▪ 🖥️ **Local or Remote Backup Option**
- ▪ 📄 **Documentation & Restore Instructions**
- ▪ ⚙️ **Initial Testing & Verification**
- ▪ 🛠️ **Support for Setup Issues**

🔍 Why Choose Rsync?

- ▪ Efficient & lightweight
- ▪ Only syncs changed files
- ▪ Perfect for remote or local backup
- ▪ Proven solution for Linux systems

💰 Pricing

- 💵 *Only $10 one-time fee per server*
- 🚫 *No hidden charges*
- 🚫 *No monthly subscriptions*
- 🔒 *You own the setup for life*

🔧 How It Works

1. **Submit your server details**
2. **We set up and test the rsync backup**
3. **You get a stable, secure backup system — forever**

💬 What Our Clients Say

"Quick and clean setup. I now sleep peacefully knowing my server is backed up daily."
— Rahul M., Web Developer

"Incredible value for $10! Support was fast and the whole process was seamless."
— Jane T., Hosting Provider

"I've used paid backup tools before, but this is the most efficient setup I've ever had."
— Luis R., IT Consultant

"Love the transparency. No subscription traps. Just a one-time setup that works."
— Maya S., Startup Founder

"They even helped me restore a file just to demonstrate. Highly recommended!"
— Ankit D., DevOps Engineer

🔹 Frequently Asked Questions

Q: Will backups run automatically?
Yes! We configure cron jobs to run backups daily, weekly, or as per your schedule.

Q: Can I use my own remote storage server?
Absolutely. We'll configure the rsync script to point to your remote server over SSH.

Q: Is the setup secure?
Yes. Rsync transfers are encrypted over SSH, and you can use key-based auth for added security.

Q: Can I back up multiple directories?
Yes. We can customize the setup to include/exclude specific directories.

Q: What if my server changes later?
We provide documentation so you can update paths or schedules easily. If needed, you can reach out for minor support.

Q: Can you restore data too?
Yes. We provide a simple restore command, and assist with the first test restore.

Q: Will it affect my server performance?
No. Rsync is lightweight and runs on low priority during off-peak hours.

Website Migration

Website Migration Plan

Ideal For:
Clients who want to move their websites to a new hosting provider or server with zero hassle and minimal downtime.

What's Included:

- Full website migration (static sites, dynamic sites, CMS-based websites)
- WordPress, Joomla, Drupal migration support
- Database export and import with integrity verification
- DNS and email configuration support
- SEO setting preservation (including permalinks, meta tags)
- Testing and validation on the new server before final switch
- Rollback plan to ensure peace of mind

Why Choose This Plan?

We understand the importance of your website's uptime and

performance. Our team ensures that your migration is smooth, secure, and seamless — without breaking your site or affecting your users.

Pricing

One-Time Fee: [$35 / Website](#)
(Special rates available for bulk migrations)

Frequently Asked Questions (FAQ)

1. How long does website migration take?
Most websites are migrated within 24 hours depending on size and complexity.

2. Will my website go offline during migration?
No, we follow zero-downtime strategies and test everything before switching over.

3. Can you migrate my emails too?
Yes, we can assist with email account migration and configuration.

4. What access do you need?
We typically need access to your old and new hosting accounts or server control panels (like cPanel, FTP, etc.).

5. Do you offer post-migration support?
Yes, we offer a 48-hour post-migration support window to fix any minor issues or adjustments.

What Clients Say

⭐ *"Flawless migration. No downtime. Everything worked perfectly on the new host. Highly recommended!"* — Rajan M.
⭐ *"They moved 3 of my WordPress sites in one evening. Super fast and professional!"* — Sneha K.
⭐ *"Even fixed a few errors I didn't know existed. Best $35 I've spent!"* — Aftab H.
