

Apache Load Balancer

⚖️ Apache Load Balancing Solutions

Smart. Scalable. Stable.

Distribute your website traffic like a pro – starting at just [₹2000 / \\$25](#)

📦 Why Choose Apache Load Balancing?

Is your website lagging during traffic spikes? Are you worried about downtime? Apache Load Balancing is the backbone of a stable, responsive online experience.

With our expert setup, you can:

- 📦 Distribute incoming traffic across multiple servers
 - 📦 Reduce the risk of server crashes
 - 📦 Serve more users faster
 - 📦 Enable seamless growth and future upgrades
-

📦 What We Offer

We implement advanced Apache Load Balancing configurations that match your traffic, tech stack, and goals.

📦 Features You'll Love:

- `mod_proxy_balancer` configuration or Nginx/HAProxy with

Apache

- Round-robin / IP-hash / least-connection balancing
- SSL passthrough or termination at proxy
- Sticky sessions for login-based applications
- Health checks, automatic failover
- Optimized headers, caching, and compression support
- Optional real-time monitoring and alerts

Our Plans

Plan	Price	Who It's For	What's Included
📄 Starter	₹2000 / \$25	Blogs & Small Sites	2-server setup, load balancing, round-robin, SSL optional
📄 Business	₹4000 / \$50	Agencies & SaaS	3–5 servers, failover config, SSL termination, traffic rules
📄 Enterprise	₹8,000 / \$100	High Traffic & eCom	Session stickiness, scaling, cache nodes, failover+backup
⚙️ Custom Setup	₹12,000 / \$150	Enterprises	Advanced stack (HAProxy/Nginx + Apache), geo-balancing, custom logic

Real-World Architecture Examples

□ 1. Basic Apache Load Balancing (2 Backends)

Ideal for: Small businesses, blogs, portfolios

□ **Example:** A photography portfolio site sees traffic during campaign promotions. With Apache, traffic is equally distributed between two backend PHP servers – preventing overload.

□ 2. SSL Load Balancing with Failover (Business Plan)

Ideal for: SaaS, Digital Agencies

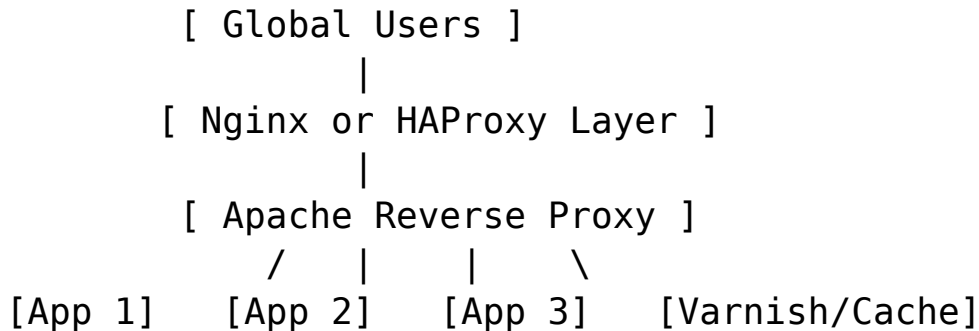

□ **Example:** A marketing SaaS platform with 5K daily users now has auto-failover. If one node fails, traffic reroutes automatically – without user disruption.

□ 3. Enterprise Architecture (Reverse

Proxy + Cache)

Ideal for: High-volume eCommerce, apps, or global sites

□ **Example:** A shopping app handles 1M+ monthly users. Nginx handles global load, Apache distributes internal traffic, and caching layer ensures super-fast load times.

□ What Our Clients Say

★★★★★

"Zero downtime during peak hours. Their setup is brilliant and well-documented."

– Akash J., Ecom Founder

★★★★★

"Perfect setup for our dev team. They explained every step and scaled it nicely."

– Tina R., CTO

★★★★★

"Great speed boost and no more panic during spikes. Support is top-notch."

– David M., Agency Owner

★★★★★

"Their team knows scaling and Apache inside-out. Highly reliable."

– Sourabh K., DevOps Consultant

★★★★★

“Site performance jumped right after they installed the load balancing setup.”

– Neha B., Web App Developer

□ Benefits for Your Business

- Serve more users with less stress
 - No more manual restarts or outages
 - Get live alerts when a server fails
 - Load test before launch
 - Future-proof architecture for growth
-

□ Frequently Asked Questions (FAQs)

Q: How do I know which plan to choose?

We offer a free consultation to assess your current setup and suggest the right plan.

Q: Do you support dynamic scaling?

Yes! We can integrate auto-scaling for cloud or containerized environments.

Q: Will SSL be affected?

No, we preserve your SSL setup or terminate it securely at the proxy.

Q: Can I monitor server load in real time?

Yes, with our \$15/month plan, you get live server health stats and downtime alerts.

Q: Is HAProxy or Nginx better than Apache alone?

For high-volume sites, yes. We can use Apache as a backend and

let Nginx/HAProxy handle smart routing upfront.

☐ Ready to Upgrade Your Infrastructure?

Apache Load Balancing ensures speed, uptime, and happy users.
Let us take your infrastructure from basic to bulletproof.

Apache Monitoring & Uptime Protection

☐☐ Apache Monitoring & Uptime Protection

Stay Online. Stay Secure. Stay Fast.

Only [\\$15/month per server](#)

Your Apache server deserves more than just setup – it needs **constant care**. We monitor, alert, and respond so your website stays online and optimized 24/7.

□ What's Included in the Plan

□ 24/7 Monitoring

- Apache Service Status (is it running?)
- Auto-restart on failure
- Process & Memory Usage Check

□ Website Uptime Monitoring

- HTTP/HTTPS ping every 1 minute
- Alerts on 4xx/5xx errors or downtime
- SSL Expiry Alert & Check

□□ Error Log Monitoring

- Track 403, 404, 500, 502, 503, etc.
- Alert on sudden spike in errors
- Error log size monitoring

⚙️□ Apache Performance Metrics

- Active connections
- Request per second (RPS)
- Slow requests detection
- Keepalive issues detection

□ Security Alerts

- Detect brute force or access attempts
- Monitor .htaccess changes
- Suspicious IP detection

□ Monthly Health Report

- Performance, uptime, and error stats
- Apache version & config summary
- Actionable recommendations

□ Priority Support

- Fast response for server issues
 - Config tweak on request
 - SSL auto-renew (Let's Encrypt)
-

□□□□□ Trusted by Real Clients

★★★★★

"We sleep better knowing our Apache servers are under expert watch."

– Rahul, Hosting Provider

★★★★★

"Got an SSL alert 2 days before expiry. Saved us big downtime."

– Sunil, SaaS Owner

★★★★★

"Their monitoring caught a crash at 2 AM. Restarted automatically. Impressed."

– Grace, Digital Agency

★★★★★

"Easy to onboard, professional reports every month, and solid support."

– Ravi, WordPress Admin

★★★★★

"\$15/month for peace of mind? 100% worth it."

– Neha, Freelance Developer

□ Frequently Asked Questions (FAQs)

Q: What kind of servers do you support?

A: We support Apache on Ubuntu, Debian, CentOS, AlmaLinux, Rocky, and others.

Q: Is this fully managed support?

A: It's a **monitoring + alert + first-level fix** plan. Full management available at additional cost.

Q: Do I need to install anything?

A: We'll install a lightweight, secure monitoring agent on your server – with your permission.

Q: How will I get alerts?

A: Alerts are sent via Email, WhatsApp, or Slack – based on your preference.

Q: Do you offer dashboard access?

A: Yes, you can opt-in for a web dashboard to view real-time Apache metrics (on request).

Q: Is there any lock-in?

A: No. Cancel anytime. Pay monthly.

□ Pricing

[\\$15/month per server](#)

Includes full monitoring, alerting, first-level fixes, monthly report, and priority support.

□ *Add-on: Monthly configuration audit and performance tuning*

available at extra cost.

- 🔧 SSL not working / HTTPS redirection issues
- 🔧 Redirect or rewrite rule errors
- 🔧 Permission or .htaccess problems
- ⚙️ 🔧 PHP or MySQL connectivity issues
- 🔧 Apache crashing or not responding
- 🔧 Virtual host conflicts
- 🔧 Server shows default Apache page
- ⚠️ 🔧 Apache memory or CPU usage spike

🔧 *One-time fix per server – [Flat \\$20](#)*

🔧 *Quick delivery (24 hours average)*

🔧 *Root/sudo access required*

🔧 *Secure handling with full backup before changes*

👤👤👤👤 Real Client Reviews

★★★★★

"He fixed my SSL and redirect issue in 15 minutes. Super fast and polite."

– Karan, Web Developer

★★★★★

"Apache wasn't even starting and I was stuck. He resolved it remotely like magic."

– Priya, Blogger

★★★★★

"I've been hosting WordPress for 5 years and this is the best support I've seen."

– Alex, Freelance Host

★★★★★

“Error 403 solved, website live again in 30 minutes. Worth every penny.”

– Shubham, Business Owner

★★★★★

“He even sent a report after fixing everything. Very professional.”

– James, App Developer

□ Frequently Asked Questions (FAQs)

Q: What access do you need to fix Apache errors?

A: We need SSH access with root or sudo privileges. You can revoke it once the work is done.

Q: How fast will you fix the issue?

A: Most fixes are completed within 24 hours from the time access is granted.

Q: Will my website go down during the fix?

A: We ensure minimum downtime. In most cases, we back up and test before applying final changes.

Q: Do you offer a refund if the issue isn't resolved?

A: Yes. If we can't fix the issue, you'll receive a full refund – no questions asked.

Q: Is this a one-time service or recurring?

A: This is a **one-time fix** per server for a single issue. If you want monthly monitoring, we offer that too.

Q: Can you handle panel-based Apache setups like cPanel, Webmin, etc.?

A: Yes, we support both panel-based and bare-metal (manual)

Apache installations.

□ Price

□□ [One-Time Apache Fix – \\$20 Per Server](#)

No hidden fees. Pay only after we confirm the issue is fixable.

👤👤👤👤 Client Reviews

★★★★★

"Quick and professional setup. My WordPress site is now blazing fast!"

– Pradeep, Blogger

★★★★★

"Tried setting up Apache myself and gave up. He got it working in 30 mins."

– Aakash, Developer

★★★★★

"Loved the optimization and caching setup. Reduced load time by 70%!"

– Laura, Agency Owner

★★★★★

"Excellent support. Always available and very skilled."

– Naveen, App Startup Founder

★★★★★

"Reverse proxy and SSL were done perfectly. Thank you!"

– Sarah, eCommerce Business Owner

📖 Frequently Asked Questions (FAQs)

Q: Which OS do you support?

A: We support all major Linux distros including Ubuntu, Debian, CentOS, AlmaLinux, and Rocky Linux.

Q: Can I upgrade my plan later?

A: Absolutely! You can move from Basic to Standard or Pro anytime by just paying the difference.

Q: Do you offer panel-based setups like cPanel or Webmin?

A: Yes. We can integrate Apache with popular control panels on

request (additional charges may apply).

Q: What kind of SSL do you support?

A: We install Let's Encrypt for free. We also support custom SSLs if you already have them.

Q: Do I need to give root access to my server?

A: Yes, for full setup and optimization, root or sudo access is required. We respect security and can work with temporary access or over SSH key.

Q: What is your response time for monthly support clients?

A: We usually respond within 1 hour and start working on any reported issues the same day.

Q: Will you handle server migrations?

A: Server migration is not included in regular plans but available as a separate service.
