Pricing:

[$15/month per server](#)
Flat rate. No setup charges. Cancel anytime.

Ideal For:

- SaaS apps using PostgreSQL
- E-commerce platforms
- Data-driven dashboards
- ERP and CRM backends

FAQs

Q: Do you support PostgreSQL in Docker or on AWS RDS?
A: Yes. We support local, Dockerized, and remote PostgreSQL (with access). For RDS, we use built-in export + download

methods.

Q: What if a backup fails?
A: You'll get an instant alert via email or WhatsApp, and we'll investigate it for free.

Q: Can I store backups in my own cloud account?
A: Absolutely. We can sync encrypted backups to your AWS S3, GDrive, or Backblaze account.

Q: Is the setup fast?
A: Setup is usually done within 24 hours after you share server access.
