Just [$30 Per Server](#)

No subscriptions. No upsells. No fine print.
One-time hardening to make your server production-ready and secure.

 Need more than 10 servers? **Bulk pricing available.**

What Customers Say

"Best $30 I've ever spent on server security."
— CTO, Hosting Provider

⬚ Frequently Asked Questions (FAQ)

⬚ What do I get for $30?

You get a **one-time full server hardening service** including firewall setup, rootkit and malware protection, permission audits, SSH hardening, and 2FA for panel logins. All configurations are customized for your server.

⬚ How long does the setup take?

Typically, **1 to 2 days per server**, depending on your current configuration and environment. We'll schedule it based on your availability.

⬚ Is this a monthly subscription?

No! This is a **one-time payment of $30 per server**. No recurring fees, unless you request optional monthly monitoring or maintenance.

⬚ Will this affect my running services?

Not at all. We take a careful, service-aware approach. Your

websites, apps, and databases remain online and uninterrupted during the hardening process.

⬜ What server types are supported?

We support most **Linux-based servers**, including:

- Ubuntu, Debian, CentOS, AlmaLinux, Rocky
- VPS, Dedicated, or Cloud instances
- Panels: cPanel, Plesk, Webmin, or plain SSH

⬜ Can I get support after hardening?

Yes! You'll receive a **hardening summary report**, and if you face any issue related to the applied changes, **we offer 7-day post-hardening support** — free of charge.

⬜ Do you offer bulk pricing?

Yes. For **10+ servers**, custom discounted rates are available. Just [contact us](#) and we'll tailor a package for you.

⬜ Get Hardened in 3 Simple Steps

1. **Book a Setup**
2. **We Audit & Harden Your Server**
3. **You Get a Full Report + Peace of Mind**
