Website Migration

Website Migration Plan

Ideal For:
Clients who want to move their websites to a new hosting provider or server with zero hassle and minimal downtime.

What's Included:

- Full website migration (static sites, dynamic sites, CMS-based websites)
- WordPress, Joomla, Drupal migration support
- Database export and import with integrity verification
- DNS and email configuration support
- SEO setting preservation (including permalinks, meta tags)
- Testing and validation on the new server before final switch
- Rollback plan to ensure peace of mind

Why Choose This Plan?

We understand the importance of your website's uptime and performance. Our team ensures that your migration is smooth, secure, and seamless — without breaking your site or affecting your users.

Pricing

One-Time Fee: [$35 / Website](#)
(Special rates available for bulk migrations)

Frequently Asked Questions (FAQ)

1. How long does website migration take?
Most websites are migrated within 24 hours depending on size and complexity.

2. Will my website go offline during migration?
No, we follow zero-downtime strategies and test everything before switching over.

3. Can you migrate my emails too?
Yes, we can assist with email account migration and configuration.

4. What access do you need?
We typically need access to your old and new hosting accounts or server control panels (like cPanel, FTP, etc.).

5. Do you offer post-migration support?
Yes, we offer a 48-hour post-migration support window to fix any minor issues or adjustments.

What Clients Say

⭐ *"Flawless migration. No downtime. Everything worked perfectly on the new host. Highly recommended!"* — Rajan M.
⭐ *"They moved 3 of my WordPress sites in one evening. Super fast and professional!"* — Sneha K.

⬛ *"Even fixed a few errors I didn't know existed. Best $35 I've spent!"* — Aftab H.
